

# Small Picture Frame

## Instructions

1. mark out your wood, 7mm wide x 320mm long x 4 pieces
2. Using sand paper sand down wood to required finish, making sure all rough edges are removed.
3. Next drill all fixing holes and countersink on the outer edge of frame to facilitate the fixing screws. ( as per diagram )
4. Next on your flat workbench we lay all our pieces of wood in the shape of the frame ready to glue and screw together.
5. Apply a small amount of glue to the joining surfaces of your frame and fit all screws as shown on plan opposite. ( leave at least 4 hours for the glue to set. )
