

Small round trug with handle assembly

1. All components of this small trug are pre made in the kit provided.
2. Using sand paper smooth all components of the trug ready for assembly.
3. Assemble sides and bottom rails as shown in the diagram and picture below. (all holes have been drilled and countersunk on the underside of the base rails so you just need to use the screws provided 12 x 30mm x no4 to fix together).
4. The handle is pre assembled and just needs screwing inside the uprights using 2 x 30mm x no4 wood screws provided.
5. Your trug is now ready to paint or varnish and then left to dry.

 Screws provided 30mm x no4
